

Welcome to
**WORLD WAR II
ISLAND**

You have crash landed on a tropical island. Luckily, some supplies have washed up in-tact and ready to use. The catch is, this island is **World War Two** and your supplies are **technologies** relevant to the conflict. Which will you choose?

Instructions and technology list on the back.

Instructions:

- 1) Individually, rank the 5 most important technologies for "surviving the island". Make sure you can defend your choices with reason.
- 2) Rank the 3 least important technologies for "surviving the island"
- 3) What do you think is the most significant technological advancement to come from WWII? Which impacts human history the most? Be able to justify your choices in a class debate.
